**Has your child ever...**

*driven a robot?*

*taken a ride on a virtual rollercoaster?*

*played a piano mounted on a wall?*

*At **INNOVATION NIGHT**, she can (and so much more)!*

This **FREE** event will provide your child the chance to complete fun activities in science, tech, math, & the arts. Working closely with Mount students and under the direction of Mount faculty, there will be stations featuring four activities each that will aim to expand your child's knowledge of STEAM fields through fun & innovative hands-on experience.
